## About

**CareerPilot** is a full-stack AI platform designed to solve the career guidance gap for students and early-career professionals. By analyzing skills, CVs, interests, and goals, the system generates personalized career recommendations, creates detailed learning roadmaps, and provides ongoing AI coaching.

### Key Highlights

-  **AI-Powered Analysis** - Uses OpenAI GPT models to analyze CVs and recommend career paths
-  **Skill Gap Analysis** - Identifies missing skills and suggests targeted learning resources
-  **Personalized Roadmaps** - Generates 3-6 month step-by-step career development plans
-  **Weekly AI Coaching** - Provides ongoing guidance, tasks, and feedback
-  **Progress Tracking** - Visual dashboards to monitor skill development

---

## The Problem

Most students and early-career individuals face these challenges:

- ✗ **Don't know what career suits their skills** - Lack of self-awareness about strengths
- ✗ **Don't know which courses/certifications to take** - Overwhelmed by options

- ✗ **Don't understand current market demand** - Skills don't match job requirements
- ✗ **Don't have a mentor to guide them weekly** - No personalized feedback

**Result:** Confusion, wasted money on wrong courses, and delayed career growth.

---

## ✓ **The Solution**

CareerPilot provides an end-to-end career guidance system:

### **1. Intelligent Profile Creation**

Users create detailed profiles including:

- Current skills and experience
- Education background
- Career interests and goals
- CV upload for automated analysis

### **2. AI-Powered CV Analysis**

The system automatically:

- Extracts skills, tools, and experience from CVs
- Identifies strength areas and gaps
- Compares profile against market demands

### **3. Personalized Career Recommendations**

Using AI and market data, generates:

- **Top 3-5 suitable career paths** based on current skills
- **Missing skills analysis** for each path
- **Recommended certifications** (AWS, Google, Microsoft, etc.)
- **Market demand insights** and salary ranges

### **4. Customized Learning Roadmaps**

Creates detailed 3-6 month plans with:

- Weekly skill-building tasks
- Course recommendations (Coursera, Udemy, freeCodeCamp)
- Hands-on project ideas
- Certification preparation guides
- Interview preparation resources

### **5. Weekly AI Coaching**

Continuous support through:

- Weekly check-ins and progress reviews
  - Personalized task assignments
  - Skill assessments and feedback
  - Career Q&A chatbot
  - Motivational guidance
-

## Features

### AI-Powered Features

-  CV Parsing & Skill Extraction (PDF/DOCX support)
-  Natural Language Career Recommendations
-  AI Chatbot Coach (GPT-4 powered)
-  Personalized Upskilling Plans
-  Automated Roadmap Generation
-  Skill-Gap Analysis Engine

### Platform Functionality

-  User Authentication (JWT-based)
-  Interactive User Dashboard
-  Profile Management System
-  CV Upload & Viewer
-  Real-time AI Chat Interface
-  Progress Tracking System
-  Visual Roadmap Viewer

### Advanced Features

-  Job Market Insights (Live API data)
  -  Course Recommendations Engine
  -  Skill Progress Visualization (Charts/Graphs)
  -  Weekly Email Coaching (Scheduled tasks)
  -  Community Resources Library
- 

## Tech Stack

### Frontend

- **Framework:** React 18 + Vite
- **Styling:** TailwindCSS v4
- **Routing:** React Router v7
- **Charts:** Recharts
- **Icons:** React Icons
- **HTTP Client:** Axios

### Backend

- **Runtime:** Node.js 20+
- **Framework:** Express v5
- **Authentication:** JWT + bcrypt
- **AI Integration:** OpenAI API v6
- **File Processing:** Multer, pdf-parse
- **Security:** CORS, cookie-parser

### Database

- **Database:** PostgreSQL
- **ORM:** Sequelize v6
- **Migrations:** Sequelize CLI

### DevOps & Tools

- **Version Control:** Git
- **Package Manager:** npm
- **Environment:** dotenv
- **API Testing:** Postman/Thunder Client
- **Code Quality:** ESLint, Prettier

### Deployment (Planned)

- **Frontend:** Vercel / Netlify
- **Backend:** Render / Railway
- **Database:** PostgreSQL (Supabase / Neon)

# Getting Started

## Prerequisites

Ensure you have the following installed:

- **Node.js** 20+ ([Download](#))
- **PostgreSQL** 15+ ([Download](#))
- **npm** or **yarn**
- **Git**

## Installation

### 1. Clone the Repository

```
git clone https://github.com/yourusername/careerpilot.git
cd careerpilot
```

### 2. Backend Setup

```
# Navigate to backend
cd backend

# Install dependencies
npm install

# Create environment file
cp .env.example .env

# Edit .env with your credentials
# - Add PostgreSQL connection details
# - Add OpenAI API key
# - Set JWT secret

# Run database migrations
npx sequelize-cli db:migrate

# (Optional) Seed database
npx sequelize-cli db:seed:all

# Start development server
npm run dev
```

Backend runs on `http://localhost:5000`

### 3. Frontend Setup

```
# Navigate to frontend (from root)
cd frontend

# Install dependencies
```

```
npm install

# Create environment file
cp .env.example .env

# Edit .env with backend API URL

# Start development server
npm run dev
```

Frontend runs on `http://localhost:5173`

---

## Environment Variables

### Backend `.env`

```
# Server Configuration
PORT=5000
NODE_ENV=development

# Database Configuration
DB_HOST=localhost
DB_PORT=5432
DB_NAME=careerpilot_db
DB_USER=postgres
DB_PASSWORD=your_password

# JWT Configuration
JWT_SECRET=your_super_secret_key_change_this
JWT_EXPIRES_IN=7d

# OpenAI Configuration
OPENAI_API_KEY=sk-your-openai-api-key-here
OPENAI_MODEL=gpt-4o-mini

# CORS Configuration
FRONTEND_URL=http://localhost:5173

# File Upload
MAX_FILE_SIZE=5242880
UPLOAD_DIR=./uploads
```

### Frontend `.env`

```
# API Configuration
VITE_API_URL=http://localhost:5000/api
VITE_API_TIMEOUT=30000

# App Configuration
```

VITE\_APP\_NAME=CareerPilot  
VITE\_MAX\_UPLOAD\_SIZE=5

## API Documentation

Detailed API documentation is available in [docs/API\\_DOCS.md](#)

### Quick Overview

Endpoint	Method	Description
/api/auth/register	POST	User registration
/api/auth/login	POST	User login
/api/user/profile	GET	Get user profile
/api/cv/upload	POST	Upload CV
/api/cv/parse	POST	Parse CV & extract skills
/api/career/recommend	POST	Get career recommendations
/api/career/roadmap	POST	Generate learning roadmap
/api/chat/message	POST	Send message to AI coach
/api/progress/track	POST	Update progress

## Database Schema

Full database documentation in [docs/DATABASE.md](#)

### Core Tables

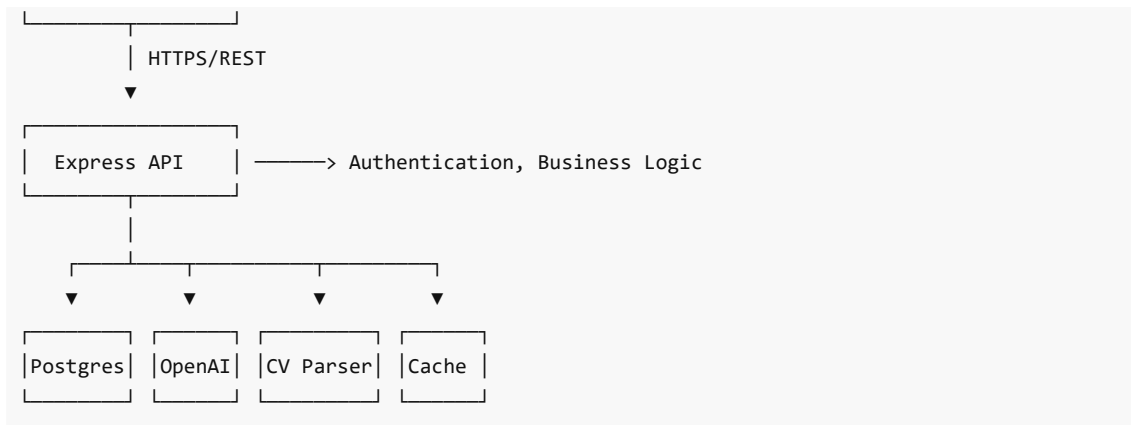

- users** - User accounts and authentication
- profiles** - User profile details (skills, education, goals)
- cvs** - Uploaded CV files and metadata
- skills** - Skills extracted from CVs and profiles
- career\_paths** - Available career paths and requirements
- roadmaps** - Generated learning roadmaps
- progress** - User progress tracking
- chat\_messages** - AI coaching conversations

## Architecture

System architecture details in [docs/ARCHITECTURE.md](#)

### High-Level Overview

## Development Roadmap

Full 4-week development plan in [docs/ROADMAP.md](#)

### Phase 1 - Foundation (Week 1)

-  Project setup & folder structure
-  Database schema design
-  Authentication system
-  Basic frontend layout

### Phase 2 - Core Features (Week 2)

-  CV upload & parsing
-  User profile management
-  OpenAI integration
-  Career recommendation engine

### Phase 3 - AI Features (Week 3)

-  Roadmap generation
-  Chatbot implementation
-  Skill gap analysis
-  Progress tracking

### Phase 4 - Polish & Deploy (Week 4)

-  UI/UX improvements
-  Testing & bug fixes
-  Documentation
-  Deployment

## Testing

```
# Backend tests
cd backend
npm test

# Frontend tests
```

```
cd frontend
npm test

# Run all tests
npm run test:all
```

---

## Contributing

Contributions are welcome! Please follow these steps:

1. Fork the repository
  2. Create a feature branch ( `git checkout -b feature/AmazingFeature` )
  3. Commit your changes ( `git commit -m 'Add some AmazingFeature'` )
  4. Push to the branch ( `git push origin feature/AmazingFeature` )
  5. Open a Pull Request
-
